

AHR EXPO 2020 Product Information

TTW® Residential Power Vent Gas Water Heater

Bradford White's TTW® Residential Power Vent Gas Water Heater has a new, quieter, more powerful blower motor that has a 2" lower profile and can vent in many difficult situations. It's designed for installations where atmospheric units cannot be used. Includes the ICON System® for enhanced First Hour Ratings.

TTW® Residential Power Vent Gas Water Heater

Bradford White's TTW® Residential Power Vent Gas Water Heater has a new, quieter, more powerful blower motor that has a 2" lower profile and can vent in many difficult venting situations. This new and improved blower adds even more ENERGY STAR® qualified models to the Bradford White portfolio. It is designed for installations where atmospheric units cannot be used. Exhaust gases are vented under positive pressure directly out of the building through the roof or the wall. The TTW® Residential Power Vent includes the ICON System® intelligent gas control for enhanced First Hour Ratings and the exclusive Vitraglas® enamel tank lining.
