Product Department Bulletin

INFORMATION: PRODUCT CHANGE - RG275H & LG275H Improvements

Dear Valued Customer,

As a part of Bradford White’s commitment to continuous improvement, we have enhanced the design of our residential high input and light duty commercial gas atmospherically vented water heaters; the RG275H and LG275H.

The traditional “T” style flue core has been replaced with a more robust recessed flue core that rests inside the flue versus on top of the flue reducer. The recessed flue core creates a more efficient and quieter product. Please note that a flue reducer is used in both designs.

“T” Style Flue Core (Previous Design)	Recessed Flue Core (New Design)
	
	
<p><u>Service Part Information:</u> Part Number: 239-50666-00 UPC: 671632076727</p>	<p><u>Service Part Information:</u> Part Number: 239-53137-00 UPC: 671632122943</p>

This change went into effect on **6/2/2021** on the RG275H & LG275H with serial numbers starting with characters **XF**. Please note that the new design is not backwards compatible and service parts should be ordered based on serial number/manufacture date.

If you have any questions, or require additional information, please contact the Product Department at 1-844-235-4958 or products@bradfordwhite.com.
