**FOR IMMEDIATE RELEASE**

**Bradford White Water Heaters adds PowerStor Series® performance calculator to RightSpec® Sizing Guide online tool**

*New feature identifies the right indirect water heater product, size, and application*

**AMBLER, Pa.** — Sept. 10, 2021 — [Bradford White Water Heaters](#), an industry-leading manufacturer of residential and commercial water heating and storage products, announces the addition of the PowerStor Series® indirect water heater performance calculator to its [RightSpec® Product Sizing Tools](#).

This simple, effective feature allows specifiers, contractors and end users to better understand the performance and system compatibility of any Bradford White [PowerStor Series®](#) indirect water heater.

“With the addition of this powerful new tool, our customers have access to tips, features and specs for our indirect water heaters right at their fingertips,” said Dan Giosia, Assistant Product Manager – Specialty Products for Bradford White Water Heaters. “We are confident this performance calculator will help contractors identify the right product, the right size and the right application for any circumstance in real time.”

Whether a contractor is specifying a product for a new installation or updating an existing system, the program is designed to handle a wide array of applications. The user simply enters the parameters specific to the application and the system will provide the performance results to determine which indirect water heater will be best suited for the job.

Just like the rest of the RightSpec® online tools, the PowerStor Series® indirect water heater performance calculator is loaded with tips and features to make sizing for an indirect water heater easier than ever. In addition, contractors and technicians can export the results into a user-friendly report that can be shared or saved for future reference.
