**Bradford White Water Heaters Infiniti® GS and GR and select eF Series® products certified by Green Restaurant Association**

*The international nonprofit recognizes leading manufacturer's tankless water heaters and ultra high efficiency tank gas water heaters for efficient, green restaurant operation*

**AMBLER, Pa.** — March 20, 2023 — [Bradford White Water Heaters](#), an industry-leading American manufacturer of water heaters, boilers and storage tanks, announces that its Infiniti® GS and GR tankless water heaters and select eF Series® Ultra High Efficiency commercial tank gas water heaters have been certified by the [Green Restaurant Association](#) (GRA), the leading voice within the Green Restaurant movement, for use in GRA-certified restaurants.

Installation and use of GRA-certified products helps restaurants achieve and maintain Green Restaurant certification, the industry's highest standard for sustainability.

"Bradford White and the GRA share a commitment to helping businesses reach their operational efficiency goals," said Carl Pinto, Jr., senior director of marketing communications for Bradford White. "This certification recognizes our innovation in creating high-performing products that reduce energy consumption so businesses can operate with maximum efficiency while making a meaningful difference."

With stainless steel heat exchangers, optional rack mounts and multiple venting options, the Bradford White ENERGY STAR®-certified Infiniti® GS and GR tankless water heaters combine reliability with flexibility to meet the demands of both residential and commercial applications and accommodate a variety of installations. The Infiniti® GR boasts an integrated recirculation pump with a dedicated connection. The Infiniti® GS offers a high-end temperature setting of 180° F and is cascadable up to 16 units. Both models are available for use with natural gas or propane.

Bradford White's ENERGY STAR®-certified EF60T125 and EF100T commercial tank gas water heaters feature BMS integration, protective powered anodes, Vitraglas® lining with Microban® antimicrobial technology, thermal efficiency up to 97%, ICON HD® controls, direct spark ignition, three-pass fire-tube heat-exchanger system, and an installed T&P relief valve.

Founded in 1990, the GRA is an international nonprofit organization that encourages restaurants to green their operations using science-based certification standards. The GRA's certification standards provide a
